

Recommended Power Management Settings

Prepared by DaveK – 3/19/20

Disable Power Management on Network Card

Windows, Start Menu

Type **Device Manager** and launch the app

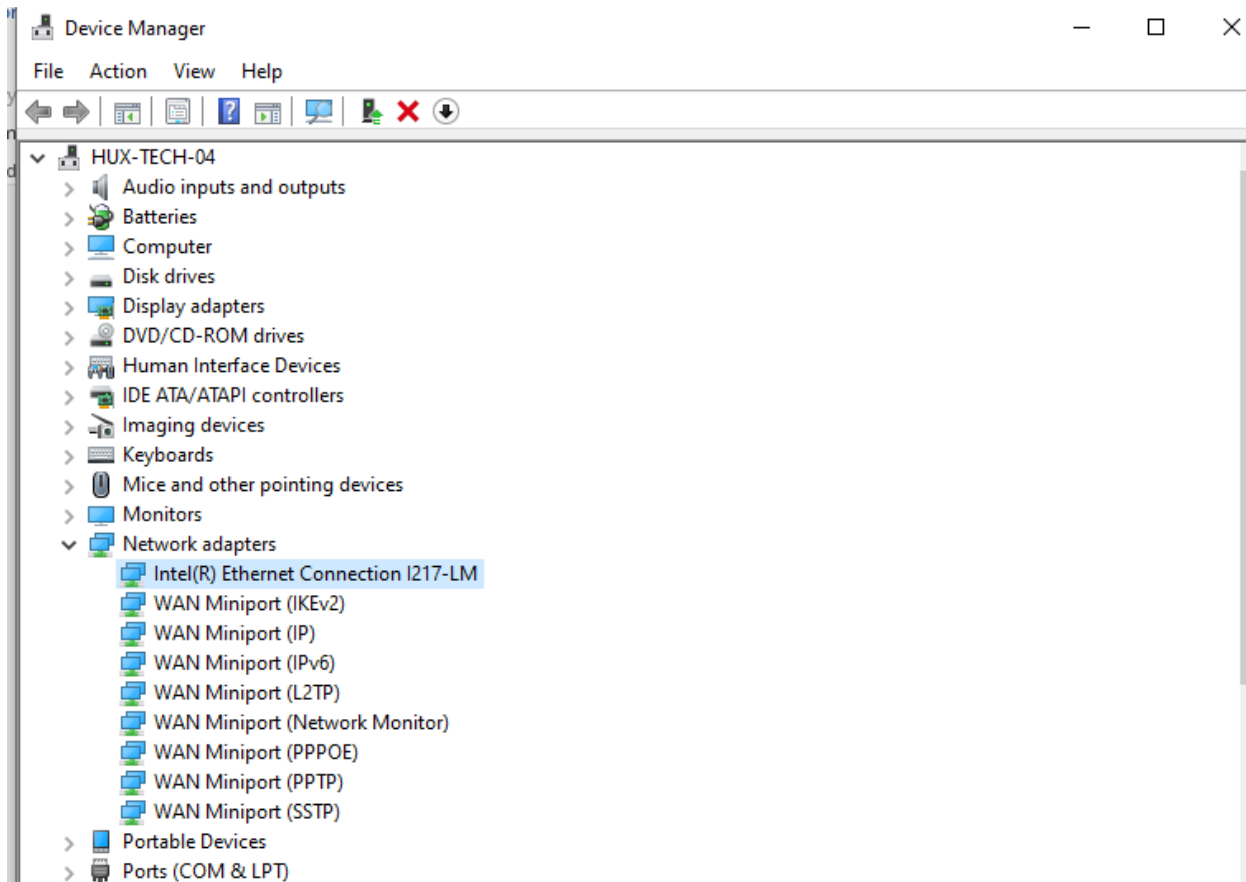

Expand **Network Adapters**

Right-Click on your network adapter (i.e. the device has **Ethernet** in its label or similar wording)

Properties, Power Management

Uncheck Allow the computer to turn off this device to save power

Click **OK** to save setting

Computer Power Management Settings

Windows, Start Menu

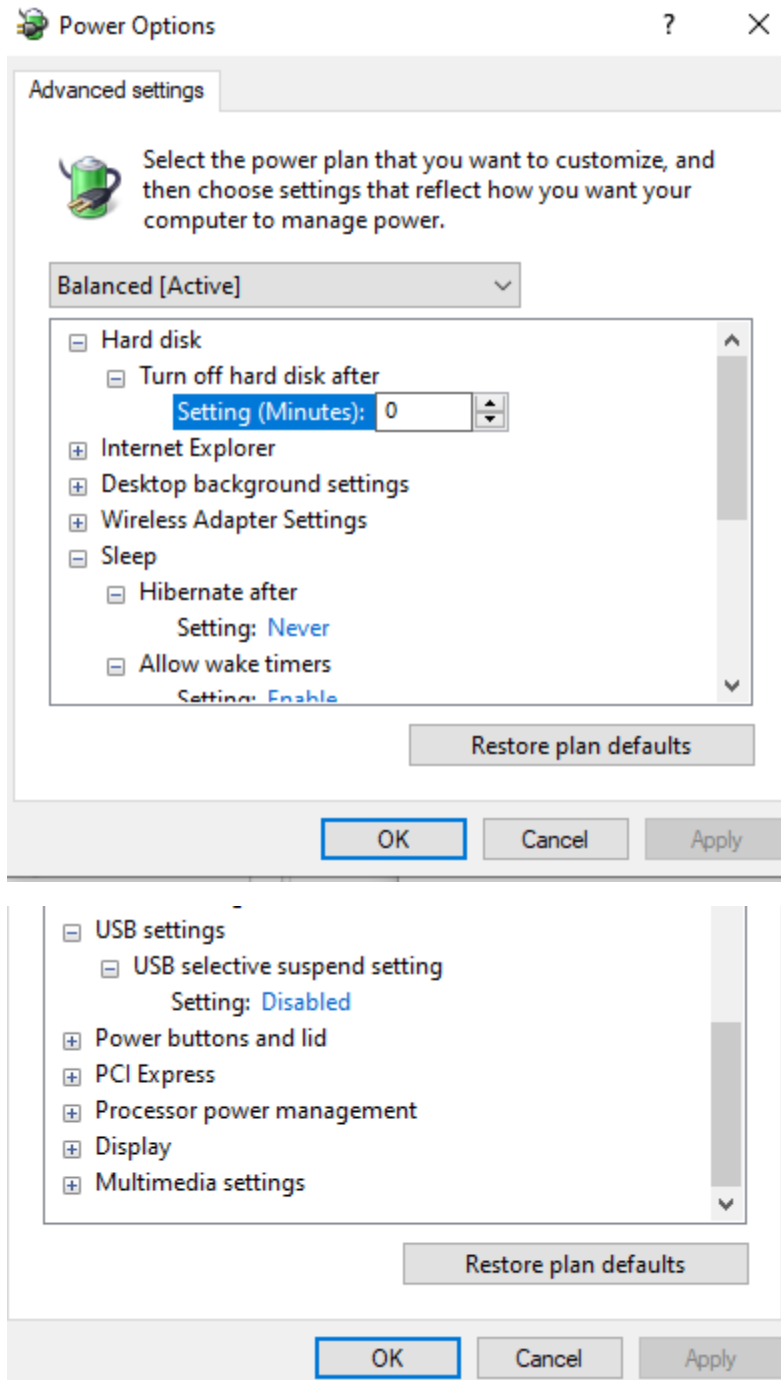

Type **Power and sleep settings** and launch the app

Screen setting set to **30 minutes** (has no impact on remote connection)

Click on **Additional power settings** and select **Balanced** power plan

Change plan settings

Change advanced power settings (change settings to match below – Turn off hard disk sleep, hibernation, and enable wake timers)

Click **OK** to save settings
