Seminar: Advanced Cartography with Adobe Illustrator

This action-packed weekend course will transmogrify you from an Adobe Illustrator novice to a skilled cartographer. You will learn how to make Excel graphs look good and how to make fancy infographics. We will make Whatcom County maps, because most of the ones on the web are bad. After that, you will apply what you’ve learned to your own project. These maps will be an impressive addition to your professional portfolio. This course counts toward the GIS minor and certificate. These skills will help you get a job.

ENVS 499Q, CRN 23868, 1 credit, $259, not included in 10–18 credit tuition
Some GIS experience helpful, but not necessary. No Illustrator experience necessary.
One weekend only, April 29–30, 09:00-15:50
